Combination part according to 1, 2, 3 so on.

Combination part according to 1, 2, 3 so on.

About the use of glue

Method for using glue:

1. After applying the glue, let it dry for a few seconds before pasting.
2. Fix it slightly with your hands, and finally put it aside to dry;

Tips:

When pasting the plane printing paper, a piece of waste bank card or telephone card can be used to wipe evenly after the glue is smeared on the wood board, and then the printing paper is pasted to squeeze out the air inside.

Types of glue:

White latex: Used for adhering soft materials, such as wood and paper.
Alcoholic Glue: Used for adhering hard materials such as cloth, plastic, beads, wire, dust cover, etc.

Installation Of Battery Box

Disclaimer: This wire cannot be plugged into the output socket

- LED lights before use, should can test the light
- Can use two AAA batteries
- The positive and negative poles of the battery are aligned and the battery is installed
- Non-rechargeable batteries, cannot be charged
- Rechargeable batteries can only be charged under adult supervision
- Rechargeable batteries should be removed from the toy before charging
- Different types of batteries or old and new batteries cannot be mixed
- Batteries should be inserted with correct polarity
- Exhausted batteries should be removed from the toy
- The power terminal must not be short-circuited

1

2

Strip 1 cm of rubber off the ends of all wires

3

Connect the gray line of the led light, the red line of the touch switch and the red line of the battery box together

4

The white line of the touch switch is connected with the white LED light line, and the black line of the touch switch is connected with the black line of the battery box

5

Wrap the exposed wires with F04

6

Hide the battery box

7

Finally, turn on the switch, touch the switch on the panel, and light the led light
